

PRODUCT DATA SHEET

CROWN GEARLUBE EP

Gearlube EP series is premium quality, heavy-duty industrial gear lubricants formulated for enclosed gear operating under severe service conditions. Gearlube EP Series are formulated from high-quality, high VI base oils selected for their oxidation stability and water-separating characteristics. Additives are incorporated which provide extreme pressure and anti-wear properties, rust and corrosion protection, increased oxidation stability, improved resistance to foaming and excellent high load performance characteristics.

BENEFITS

- Excellent load-carrying capacity.
- Outstanding anti-wear properties.
- Excellent oxidation stability.
- Rust and corrosion protection.
- Excellent lubricity & good anti foam properties.
- Minimizes friction, resulting in reduced bulk oil temperature.
- Effective demulsibility for rapid water separation.
- Resistance to micro-pitting.

PERFORMANCE LEVEL

Meets and Exceeds:

- DAVID BROWN Table E
- U.S STEEL 224
- DIN 51517 PART 3
- AGMA 9005-D94(EP)

APPLICATION

Gearlube Oil Series is recommended for industrial enclosed gear drives for both circulation and splash systems. It is particularly recommended for gear sets operating under heavy or shock load such as spur, helical and bevel gear drives.
