

ATF HD-VI

Section 1. Identification

Material name: ATF HD-VI 2680 **Product Code**

SDS 2680-1 AU SDS no.

Relevant identified uses of the substance or mixture and uses advised against

Transmission Lubricants Use of the substance/

For specific application advice see appropriate Technical Data Sheet or consult mixture

our company representative

Manufacturer **Petromin Corporation**

Supplier P.O.BOX: 1432, Jeddah 21431

Section 2. Hazard(s) identification

Not classified as Hazardous according to criteria of National Occupational Health

& Safety Commission (NOHSC), Australia. Not classified as Dangerous Goods Classification of the substance or mixture

according to the Australian Code for the Transport of Dangerous Goods by Road

and Rail.

GHS label elements:

Hazard Pictograms: No hazard pictogram is used No signal word is used Signal word:

Hazard statement: No known significant effects or critical hazards

Precautionary statement:

Not applicable **Prevention:** Not applicable Response: Storage: Not applicable Not applicable **Disposal:**

Other hazards which do

Not applicable not result in classification

Product Name: ATF HD-VI Version#: 1.0 Page 1 of 7 Product code#: 2680

Date of issue: 09/11/2018

Section 3. Composition and ingredient information

Substance/ mixture Mixture

Components	CAS No.	Percent
Distillates (petroleum), hydrotreated light paraffinic	64742-54-7	90-95%
Performance Additives	Mixture	5-10%

Section 4. First aid measures

Description of necessary first aid measures

Eye contact In case of contact, immediately flush eyes with plenty of water for at least 15

minutes. Eyelids should be held away from the eyeball to ensure through

rinsing. Check and remove any contact lenses. Get medical attention

Skin contact No specific first aid measures are required. As a precaution, remove clothing

and shoes if contaminated. To remove the material from skin, use soap and

water.

Inhalation If inhaled, remove the person to fresh air. Get medical attention if symptoms

Inegstion Do not induce vomiting. As a precaution, get medical advice.

Symptoms caused by

exposure

Not available

Special Treatment No special treatment

Section 5. Fire-fighting measures

Dextinguishing media

Suitable extinguishing medialn case of fire, use Foams, dry chemicals, CO2, nylons and powders

unsuitable extinguishing Do not use water

media

Protection Equipment Heat resistant suit and gloves, Self-contained breathing apparatus

Special Risks None

Special Measures Not required

Combustion Products CO2, H2O, CO (in defect of air), nitrogen, sulfur and phosphorus oxides

Section 6. Accidental release measure

Precautions for the Hazard of physical fouling to coasts, soils, etc. due to low solubility and high

Environment viscosity of the oils. Avoid the material entering water intakes

Clean-up Method Treat as an accidental oil spill or leak; avoid dispersion of the material with

mechanical barriers. Remove with physical or chemical treatment

Personal Precautions Avoid prolonged contact with contaminated clothes or with the product

Personal Protection Gloves and goggles or face shield

Product Name: ATF HD-VI

Product code#: 2680

PETRO MIN

SAFETY DATA SHEET

Section 7. Handling and storage

Precautions for safe handling & storage

Take precautions against static electricity discharges. Use proper grounding procedures. For information on the design of the storeroom, reference should be made to Australian Standard AS1940 - The storage and handling of flammable and combustible liquids. Reference should also be made to all applicable local and national regulations. Classified as a Class C2 (COMBUSTIBLE LIQUID) for the purpose of storage and handling, in accordance with the requirements of AS1940. This product should be stored and used in a well-ventilated area away from naked flames, sparks and other sources of ignition.

Dangerous practices

Not available

Section 8. Exposure control/ Personal protection

Exposure Standard

No exposure standards have been established for this material, however, the TWA National Occupational Health And Safety Commission (NOHSC) exposure standards for oil mist is 5 mg/m³.TWA (Time Weighted Average): The average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day week.

Respiratory Protection

If engineering controls are not effective in controlling airborne exposure then an approved respirator with a replaceable vapour/mist filter should be used. Reference should be made to Australian/New Zealand Standards AS/NZS 1715, Selection, Use and Maintenance of Respiratory Protective Devices; and AS/NZS 1716, Respiratory Protective Devices, in order to make any necessary changes for individual circumstances.

Eye Protection

Safety glasses with side shields, goggles or full-face shield as appropriate recommended. Final choice of appropriate eye/face protection will vary according to individual circumstances i.e. methods of handling or engineering controls and according to risk assessments undertaken. Eye protection should conform with Australian/New Zealand Standard AS/NZS 1337 - Eye Protectors for Industrial Applications.

Hand Protection

Wear gloves of impervious material. Final choice of appropriate gloves will vary according to individual circumstances i.e. methods of handling or according to risk assessments undertaken. Reference should be made to AS/NZS2161.1: Occupational protective gloves - Selection, use and maintenance.

Body Protection

Suitable protective workwear, e.g. cotton overalls buttoned at neck and wrist is recommended. Chemical resistant apron is recommended where large quantities are handled. Industrial clothing should conform to the specifications detailed in AS/NZS 2919: Industrial clothing.

Section 9. Physical and chemical properties

Information on basic physical and chemical properties

Appearance:

Liquid **Physical state:**

Color: Light Amber Specific Gravity (at 15°C): 0.845 (typical)

Flash point: 223 ºC

Explosive Properties: Not available **Oxidizing Properties:** Not available

Insoluble (100 PPM max. H₂O) Water Solubility:

Organic solvents **Solubility:** Not available **Vapor Density:** Not available **Vapor Pressure:** Viscosity at 40°C: 29.5 cSt (typical) **Pour Point:** -45 ºC (typical) Not available **Boiling Point:**

Section 10. Stability and reactivity

Reactivity Stable under recommended transport storage conditions

The product is stable **Chemical stability**

Not available **Polymerization Risk**

Materials to Avoid Strong oxidants react with oils and organic materials

Hazardous Decomposition Not available

products

Condition to Avoid Exposure to open flames

Section 11. Toxicological information

Contact with skin, eyes and inhalation. Ingestion is not frequent. **Routes of Exposure**

No malignant acute effects are known. Chronic effects due to repeated **Acute and chronic Effects**

exposures are irritation, dermatitis and acne

Not available Carcinogenicity

No evidences **Reproductive Toxicity**

Respiratory tract deficiencies and dermatological problems

Medical Conditions which

increase Hazard to

Exposure

Product Name: ATF HD-VI Version#: 1.0 Product code#: 2680

Page 4 of 7 Date of issue: 09/11/2018

Section 12. Ecological information

Pollutant Potential:

Persistence and Degradability

the material is oily and viscous and floats on water. It presents a high physical fouling potential, mainly in sea-spills; by contact, destroys small acuatic organisms and makes living difficult for upper organisms, not allowing the

Potential

Mobility/Bioaccumulative it does not present bioaccumulative problems in living organisms or incidence in the tropic food chain, although it may cause long-term adverse effects in the

acuatic environment, due to its high physical fouling potential

Eco toxicological Effect: Dangerous for acuatic life in high concentrations (spills).

Section 13. Disposal consideration

Disposal Methods (surplus)

Recycling and recovery of base oils when possible

Disposal (waste)

Only in specific prepared and controlled areas. Avoid releasing oils to sewers because they can destroy water treatment plant Microorganisms. Do not attempt to clean containers since residue is difficult to remove; dispose in a safe way.

Handling (waste)

Labeled and sealed containers. Avoid direct contact with waste oils.

Section 14. Transport information

Special Precautions Stable at room temperature and during transport. Store in cool well ventilated

areas.

Not classified as Dangerous Goods according to the Australian Code for the **Transport Information**

Transport of Dangerous Goods by Road and Rail.
